About Dina Dove

Since the mid 1970s, Dina Dove has built several successful businesses. For many years she lectured on entrepreneurship at colleges and for various business organizations. In 1992 she was named the Female Manufacturer of the Year for the State of Kansas. After selling that company, she co-authored several multi-media business and financial coaching programs that were implemented by small business owners throughout the US.

For quite some time, her dream had been to help people find their true passion. With the publication of her first inspirational work, *The Baglady's Guide to Elegant Living*, she expanded her focus into the personal development field.

Dina says, "Business and financial skills are certainly important, but unless you approach those skills from a place of personal authenticity, the satisfaction you seek will continue to elude you. As a result of the work we do together, my clients find their true passion. I get to watch their eyes light up and see their hearts start to sing. Nothing is more rewarding than that."
